Quality Service with Customer Focus

Based in Derrimut in Melbourne's west, Finer Hydraulics provides clients with a quality service and customer focus that is unmatched by competitors in the hydraulic sales and service industry.

By combining good old-fashioned customer service with leading expertise and facilities, we are providing clients across Melbourne with an unrivalled service experience.

Our large modern workshop is equipped with full machining and service facilities, supported by highly qualified workshop and engineering staff who work to limit machine downtime for you. We are specialists in delivering a range of hydraulic equipment, including pumps, motors, valves and cylinders, and have specific expertise in cylinder repair and general hydraulic repairs.

With an extensive range of products available, Finer Hydraulics provides a convenient one stop shop and hassle-free hydraulic solution that caters to the individualized requirements of our clients and their projects.

Finer Hydraulics provide a wide range of services for your company with end to end solutions. It is the goal of our hydraulic and engineering team to see your vision for your company become a reality.

With full system design and manufacturing facilities, large stock holding and exposure to a wide variety of industries, Finer Hydraulics has the knowledge and experience to provide customized solutions to meet your needs.

Finer Hydraulics has the expertise to provide hydraulic solutions across a wide variety of industries such as:

- Earthmoving
- Construction
- Waste
- Mining
- Transport
- Forestry
- Cranes
- Processing & Manufacturing
- Demolition & Recycling
- Materials Handling

IN HOUSE

Finer Hydraulics are specialists in delivering major repairs and component testing of hydraulic cylinders, pumps, motors and valves. Identifying solutions and working to your timelines and budget is our priority. When our competitors say it can't be done, we'll explain how we'll do it.
